Project partner:

LTTA1: Testing remote control with Vuzix M300 and PointR software

TASK: Solve the burr puzzle with your pair using Vuzix M300 Ar-glasses and PointR software with mobile phone

Materials: wooden burr puzzle, printed instructions how to assemble burr puzzle, power point presentation to info about glasses and software, mobile phone

Instructions: (Power point in Teams)

I. Solve the burr puzzle with your pair 1/2

- This task includes instructions on how to assemble the puzzle
- One student gets unassembled puzzle, and the other student gets the instructions
- The pair is sitting back-to-back and cannot see each other. You have to communicate only by speaking.
- The fastest pair to solve the puzzle will win a prize!

II. Solve the burr puzzle with your pair 2/2

- Test the glasses with your pair
- Change it another way around. Other student now has instructions and the other student burr puzzle
- Pairs are sitting back-to-back and cannot see each other's. You are only able to use PointR software and its content and features.
- But now the assembler has both hands in use and the instructor is seeing what is happening in front of the assembler.
- How long did it take now?
- The pair who reduced the most time will win a prize!
